STONETM

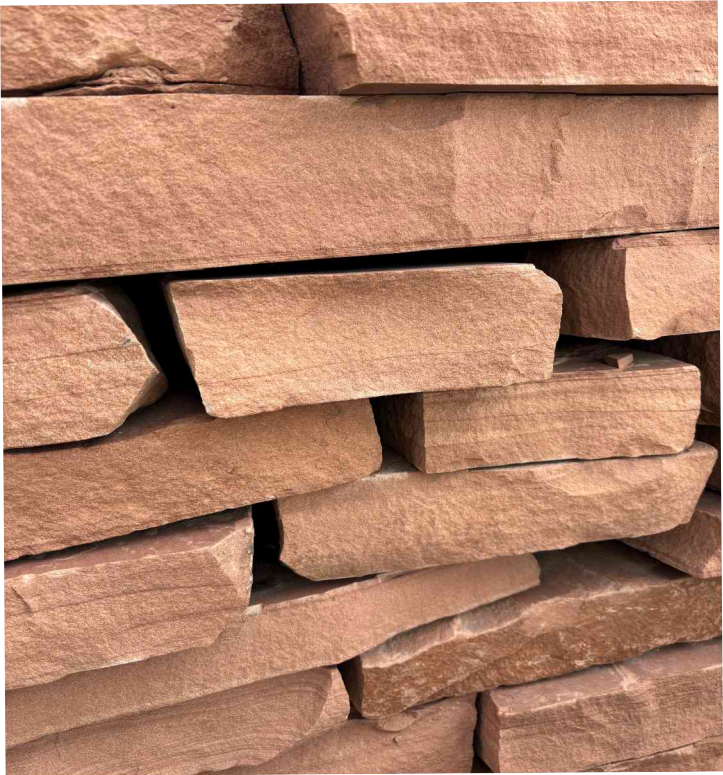

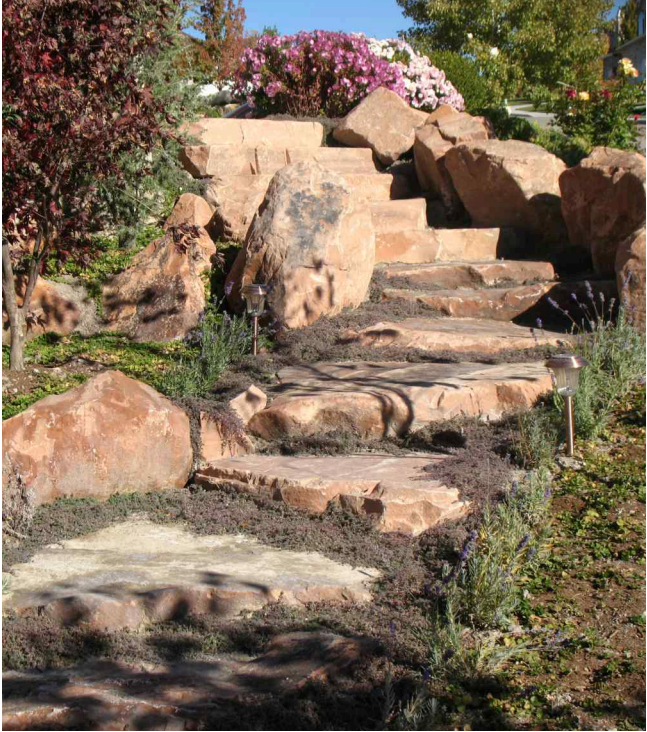

CHEROKEE RED

SANDSTONE

CHEROKEE RED

Cherokee Red offers brilliant variety and wonderful range in reddish tones. This is a high integrity sandstone. It is relatively smooth and flat, and is very durable. Cherokee sandstone is weather and frost resistant with a non-slip texture, making it an excellent stone choice for any condition.

FISH CREEK

COMMON APPLICATIONS

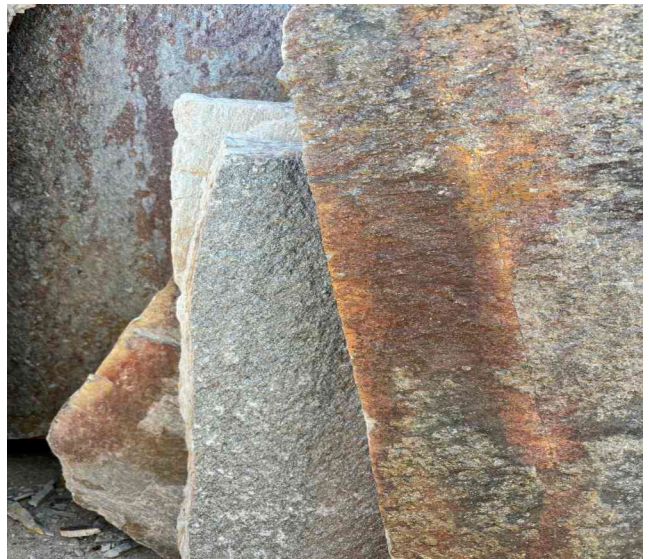

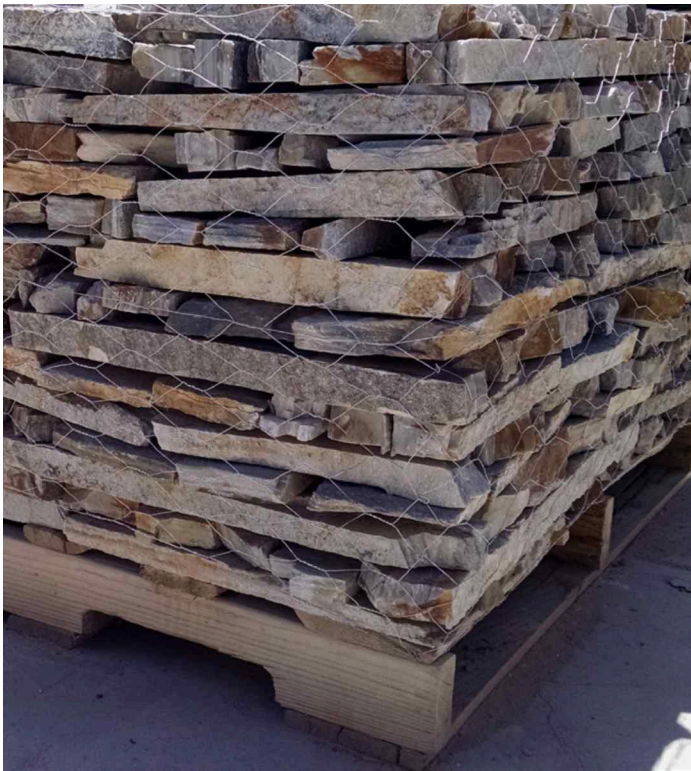

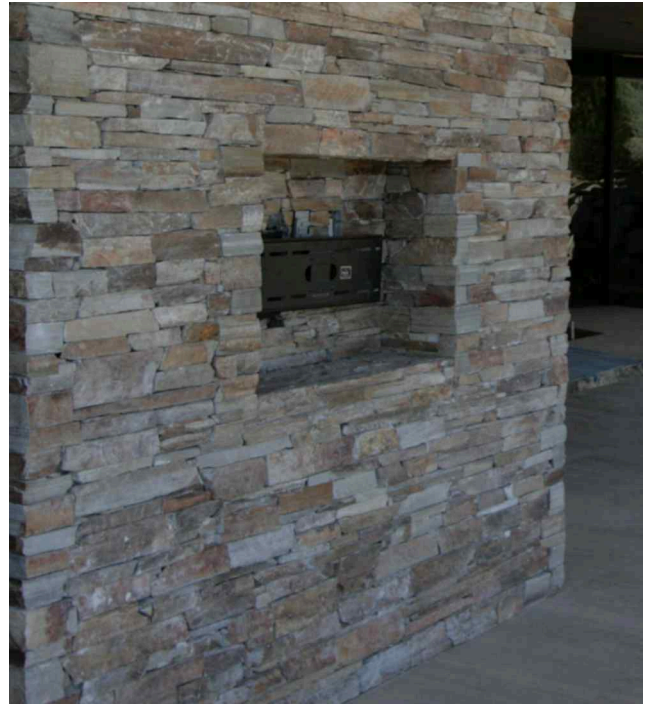

BAKER GOLD

QUARTZITE

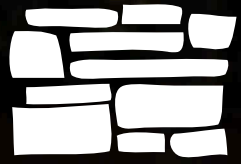

BAKER GOLD

This Nevada ledgestone is a gray and gold quartzite with gold and brown edges. It is extremely hard, and naturally fractures into rectangular patterns making it perfect for a variety of indoor and outdoor architectural projects. Originally formed as sandstone, quartzite has an above-average resistance to scratches and blemishes than other materials and requires little maintenance.

COMMON APPLICATIONS

MOUNTAIN ASH GRANITE

FINE-GRAINED GRANITE

MOUNTAIN ASH GRANITE

Granite is a natural stone formed in the Earth's crust. It is the result of the cooling of lava composed of minerals. The different colors and patterns in the granite are a direct result of specific amounts of minerals. Our fine grain granite ranges from medium to dark gray and contains bronze streaks.

COMMON APPLICATIONS

SEASALT BLUE

Granite is formed when magma from a volcano or hotspot hardens below the surface. As it cools and is exposed to weather and other minerals it create unique patterns and colors. Our Seasalt blue granite has hints and streaks of subtle blue mixed with gray.
